METAL SUPPLY AT YOUR DOORSTEP

Industrial Metal Supply locations carry a long list of metals in various alloys, shapes, and sizes; specialty and decorative metals; as well as a large selection of metalworking tools and supplies. In all, the company's six locations total over 400,000 total square feet of warehouse and store space.

At IMS customers can place their order in the morning, have it cut to size and pick it up a couple hours later in **Wit-Call**. Or if businesses need one piece for a prototype or pre-cuts and accessories, customers can shop any of the stores six days a week. For large orders IMS prides itself on rapid turnaround and can cut, shear or saw to size and have it on the delivery truck the next morning. IMS is the only metal distributor that can service manufacturers, fabricators and job shops to contractors, maintenance departments and hobbyists all within hours.

ABOUT US

Industrial Metal Supply Company (IMS) is a full line metal distributor serving Southern California and Arizona metal users in Los Angeles, San Diego, Orange County, Inland Empire, Phoenix, and Tucson. Since 1948, the company has grown to become a respected aluminum, steel, stainless steel, copper and brass supplier by combining a wide range of products and services with customer-focused support.
